St. Mary's Food Bank®

Home Delivery

Ways Your Agency Can Partner with St. Mary's Food Bank Home Delivery

Become a Referral Partner for the Home Delivery Program - *Maricopa, Pinal, Yavapai, and Greater Flagstaff agencies only.*

Your organization can partner with St. Mary's Food Bank's Home Delivery Program by serving as a referral partner for neighbors in need. How can you refer neighbors to the program? Simply add the online Home Delivery Registration Form to your website. Each organization will receive a unique referral link, and a staff member will provide you with monthly statistics on how many people were referred to Home Delivery through your organization. St. Mary's Food Bank will also conduct a quick, 30-minute online training for your staff and volunteers to show you how to complete the form, answer questions, and assist neighbors in need of Home Delivery.

Become a Pickup Hub for the Home Delivery Program - *Maricopa agencies only.*

Your organization can partner with St. Mary's Food Bank's Home Delivery Program by serving as a pickup hub for our third-party delivery drivers to collect food packages and return any undelivered items. To participate, you must be willing to host a Home Delivery pickup **at least once per week.**

Your staff and volunteers will receive a list of neighbors within 10 miles of your location who have requested Home Delivery for that day. They will assemble food packages to meet those needs and coordinate the pickup with our delivery drivers. If a neighbor is not at home, the driver will return the food package to your facility after completing their route.

St. Mary's Food Bank will provide a one-hour training session on how to serve as a pickup hub for the Home Delivery Program and will assign a staff member to support your location during the launch phase (the first 1–3 months).

Please note: *There are a limited number of pickup hub locations available throughout Maricopa County.*

Launch your own Home Delivery Program - *Anywhere within Arizona.*

St. Mary's Food Bank can assist your organization in launching its own Home Delivery Program. Whether you choose to utilize volunteers, staff, or third-party delivery services, we can help ensure your program remains in compliance while meeting the needs of your community. We will work with your organization to establish a system that fits your operations, sharing our years of experience to create a positive experience for both your team and your neighbors.
